

[Apeks/Aqualung Updates](#)

Apeks Marine Equipment Ltd. Social Media Updates September 2017 – Written by Michael Holloway

1. Apeks Marine Equipment is home to the highest quality diving equipment, used by both commercial and military divers throughout the UK and globally. We have total control over all our manufacturing, making us first-rate in both design and quality. Visit www.apekssdiving.com for more information about our scuba diving equipment.
2. Apeks are champions of the underwater world and we have always had an environmental ethos. Since 2006, we've looked at the business from an environmental point of view, including minimising waste and reducing environmental risks. www.apekssdiving.com/uk/the-environment.html
3. Our equipment is designed to perform even in the harshest of conditions. Not only do they meet regulation standards but they are durable and reliable enough to take on almost any type of dive. This is why we hold the NORSOK Safety Accreditation and are CE approved for alternate air sources. www.apekssdiving.com/uk/safety.html
4. Imitation might be the sincerest form of flattery, but when it comes to life preserving equipment, it's just dangerous. Please ensure that you buy our equipment from a designated diving store. www.apekssdiving.com/uk/imitations.html
5. We regularly post vacancies on our website. If you have the skills, experience, and have a passion for scuba diving equipment, visit our website for more information. www.apekssdiving.com/uk/job-vacancies.html
6. The Apeks Tek Team is a group of technical divers based around the world. They take our products and rigorously test them in natural environments to give our products an honest performance test in the real world. www.apekssdiving.com/uk/team-divers.html
7. How is a regulator made? Well, they're all designed and manufactured at our headquarters in Blackburn. Have a look behind the scenes at Apeks to get an idea of our manufacturing processes. <https://vimeo.com/111526523>
8. All our regulators are precision-made, and range from a suitability for cold-water dives to extreme depths. For more information and to have a look at our high-quality products, please visit our website. www.apekssdiving.com/uk/regulators/product/listing.html
9. Our wide selection of buoyancy compensators includes the WSX-25 Sidemount Harness. Made from super-tough, abrasion-resistant Armoguard, it's a high-quality, easily adjustable BCD. www.apekssdiving.com/uk/bcds/product/listing.html
10. Our selection of high-quality drysuits include the Fusion KVR1 with Aircore. This features a protective outer layer ballistic strength para-aramid synthetic fibre skin with innovative AirCore breathable inner layer. www.apekssdiving.com/uk/dry-wear/product/listing.html
11. Are you in need of extra pocket space on your dive but you don't want extra weight? Apeks tech shorts are designed to be worn above a dry or wet suit, creating valuable pocket space without the need for bulky gear. www.apekssdiving.com/uk/neoprene/product/listing.html

12. Designed in collaboration with the US military, Apeks fins are made from a thermoplastic rubber with an over-sized foot pocket to accommodate drysuit boots. This is why they're known for their outstanding performance. www.apeksgiving.com/uk/fins/product/listing.html
13. Sometimes it can be difficult to see well underwater, but it's important to keep an eye on your pressure gauge. Our high-quality valves contain well-built submersible pressure gauges that clearly display both pressure and depth for easy-viewing underwater. See more on our website. www.apeksgiving.com/uk/gauges/product/listing.html
14. We design and manufacture high-quality manifolds and cylinder bands. Apeks cylinder bands are made from marine-grade stainless steel and are essential for optimal performance for your scuba diving activities. www.apeksgiving.com/uk/manifolds-cylinder-bands/product/listing.html
15. Our unique diving watches are essential for checking the time underwater, so you know how long you've been down there. The Apeks 1000m Dive Watch goes as deep as 1000m and is made from tough stainless steel. The helium release valve lets out built-up helium gas to protect the watch during decompression. See our website for more of our expert diving watches. www.apeksgiving.com/uk/dive-watches/product/listing.html
16. Underwater divers should deploy a safety marker buoy. These are attached to a dive spool, which can be tricky to use underwater. Apeks spools have a unique flared design with an outer grip, which makes it much easier to wind, even when wearing gloves. www.apeksgiving.com/uk/spools-and-line-markers/product/listing.html
17. Did you know our DRY100L Single Core dry bag includes a drain dump, which means you can use your bag as a kit wash bath? To find out more about our unique, high-quality dry bags, please visit our website. www.apeksgiving.com/uk/dry-bags/product/listing.html
18. You need to protect your feet while diving. Our EVO4 boot has a renowned Vibram® Megagrip sole, providing unparalleled traction and durability. To find out more about our boots and gloves, visit our website. www.apeksgiving.com/uk/boots-and-gloves/product/listing.html
19. Apeks have specialised in the design and manufacture of specific military and professional products for the UK and overseas forces for over 20 years. We still maintain our reputation in high-performance, high-quality scuba diving products. www.apeksgiving.com/uk/military/product/listing.html
20. Apeks suit valves make ascending underwater effortless yet controlled. The hands-free valves allow expanding air to vent from the suit so you can reach the surface safely and easily. www.apeksgiving.com/uk/suit-valves-hoses/product/listing.html
21. The Apeks full face masks are designed from the ground up to meet the specific needs of the diver. The horizontally mounted regulator minimises the difference in ambient pressure exerted on the second stage diaphragm, reducing the need for adjustment. This means the diver can breathe normal air at the surface to conserve their scuba air. www.apeksgiving.com/uk/full-face-mask/product/listing.html
